MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Post Office in the Town of Lacombe in the Province of Alberta, on Saturday, January the 9th, A.D. 1932 at the hour of 2 o'clock in the afternoon, the following property, namely:

The North West Quarter of Section 24, Township 40, Range 27 West of the Fourth meridian in the said Province, containing by admeasurement 100 acres more or less. Reserving thereout all mines and minerals, excepting thereout 6 acres more or less, as described in Certificate of Title No. 222-H-3.

Terms of sale to be ten per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is about 1½ miles from Lacombe and is 1½ miles from the nearest school. The nearest grain elevator is at Lacombe.

The land consists of 2½ to 3 feet of black loam with a clay subsoil. The land contains approximately 154 acres of which 100 acres are under cultivation. Another 10 acres could be broken. The land is all fenced with three wires and some woven wire. There is one well on the land.

The following buildings are erected on the land: Dwelling house 22 ft. by 26 ft.—14 ft. by 22 ft. Barn 48 ft. by 20 ft.—16 ft. by 48 ft. Granary 30 ft. by 28 ft.—14 ft. by 20 ft. Hog house 20 ft. by 22 ft. Pump house 10 ft. by 14 ft. and sheds. The buildings are in a fair state of repair.

For further particulars and conditions of sale, apply Messrs. Newell, Lindsay, Emery & Ford, Barristers, Canada Permanent Building, Edmonton, Alberta.

Why send your money out of town when you can save by buying at Lacombe Furniture Store.

SWEET'S PHARMACY
The place to come and see just the gift you are looking for. We have re-arranged our store to make room for our Christmas stock which is the largest and most varied in town.

BLACKFALDS
The service at Canyon will be of special interest. It will be held in the Canyon School house at 3 p.m. and will be a White Gift Christmas Service. The friends will bring their gifts for children from cradle age to 16 years for a Mission class in the dried out area of Hessemore, Sask. The class has altogether 36 members and we are undertaking to give them a real Christmas as we understand home will have no gifts unless we send them.

The service at Blackfalds Sunday School will be of the same nature. The Christmas Tree will be decorated and the children will place their gifts for the Hessemore children on the tree. The Sunday School meets at 11 a.m. At the evening service the Pastor will give a Christmas message. The adults will bring their gifts, needful things and money and at the time of the offering will present them. You are invited to these services and to bring your gifts with you. Services at Spruceville next Sunday at 11:15.

THE DOLL CONTEST

The doll contest is going over big at Sweet's Pharmacy—are you helping to give some girl a happy New Year. Contest closes Dec. 28th. The ten leading Dolls on Tuesday are:

Christmas Tree on Tuesday, Dec. 22nd.
Vesper service by the C.G.I.T. girls will be held in St. Andrew's Church on Sunday afternoon, Dec. 20th, at 4:15.

Christmas cards, seals, fancy wrapping paper and card at 20 to 25 per cent. off the maker's marked selling price at Hotsen's. Save a little.

Throughout the last thirty-one years our reputation as a watchmaker has been well known. If you would have the best workmanship in this line, try Hotsen.

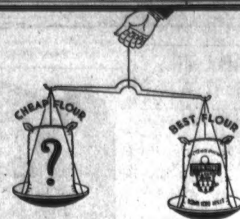

The Lacombe Furniture Store tells us that beds and bedding have never been lower or so good in value as at present. Their prices are ridiculously low.

Reports of various departments of work sponsored by the Lacombe Board of Trade were received at their last quarterly meeting. These included among other activities, the Seed Fair, Field Crop Competition and District Exhibits. Financial Statement showed a balance on hand of some \$180.00. Arrangements are being made to hold the annual recognition banquet early in January, at which time Mr. John Imrie of the Edmonton Journal and Mr. H. E. Craig, Deputy Minister, will be invited to give the main addresses of the occasion. W. F. Puffer, F. H. Reed, G. T. Jackson, T. Wilkes and A. Belcher were appointed a Nominating committee to recommend a slate of officers to the annual meeting which will be held Tuesday, January 12th. Mr. C. A. Sneath, newly appointed manager of the Royal Bank, was welcomed into the Society.

Winter's Variety Store Suggestions—Moose Cakes and Moccasins; Andiques and Currier; Red Indian Bed Work; Oriental Goods; Silk and Bead Lamp shades; beautiful Beaded bags and purses; China, Vases, Jardinières, Tea Sets; Silk Baby Cakes and Quilts; Baskets, Trays, Pearls; Silk Scares; large stock of "Apostrophe" Brackets and Comb sets; Baby sets; Manicure sets; small pieces; cloaks, watches, jewelry, lovely necklaces; Men's belts, suspenders, garters, handkerchiefs, mittens, smoker's supplies; baggage for Gents and Ladies; Imported Dinner Sets. French how would be well advised to look over this immense stock before buying elsewhere. The prices are low.

WORLD HAPPENINGS
BRIEFLY TOLD

Migration from Great Britain to the Dominion is not being encouraged or assisted at present, according to Hon. J. H. Thomas.

Lord Eltham moved a resolution in the House of Lords, urging no delay in calling the Imperial Conference in Ottawa.

Gold has been discovered in considerable quantities on the Homestead mine at Perry Creek in the East Kootenay, according to information received at Nelson, B.C.

Sir John Gilmour, Minister of Agriculture, has been appointed member of the British cabinet committee to attend the Imperial Economic Conference in Ottawa.

Henry Heikkinen, Port Arthur, Ont., has claimed bounty on the skins of nine timber wolves. He will receive \$225 for this record number of timber wolf skins.

No part of the world has a more assured economic future than Canada. Col. Hanford MacNider, United States Minister to Canada, told the New England Council at Boston.

Reconstitution of the British House of Lords to allow members from Canada and other Dominions hold seats is suggested by "Scrutator" writing in the Sunday Times.

Miss Ethel Catherwood, Saskatoon's Olympic champion, has taken up residence in San Francisco, where she will remain until after the 1932 Olympic games.

Edward Alexander McCourt of Kitchissippi was declared Alberta Rhodes Scholar at a meeting of the selection committee held in Edmonton. McCourt has a brilliant scholastic and athletic record.

Commercial failures in Canada showed a decrease in September, totalling 165 compared with 192 in September, 1930. Liabilities of assignors totalled \$5,166,576 compared with \$2,081,474.

Production of railway rolling stock in Canada during 1930 was valued at \$104,992,701, the second highest figure on record. Of the 37 firms engaged in the industry four are in Manitoba and three in Alberta.

Dame Rachel Crowley, D.B.E., who was in Vancouver on her way to Great Britain from the conference of Pacific relations in the Orient, had words of praise for the work of the League of Nations in the Chinese-Japanese controversy.

Droth Resisting Plants

Introduction Of New Type Of Grasses Might Be Of Great Value To Canada

Dr. O. McCone, formerly of the Ontario Agricultural College at Quesnel, expresses the opinion that in Russia might be found several plants of immense value to Canada and the rest of the world. He suggests a new kind of exploration, a search for plants which may with the work of scientists bring millions of dollars to Canada. In particular he thinks a search should be made for droth resisting strains of plants and grasses in Russia, and plants resisting high winds and heavy snow in Scandinavia.

Since Dr. McCone made his report to the Empire marketing board, his theory has been confirmed by the discovery in Bechuanaland, South Africa, of hitherto unknown droth resisting woolly finger grass which is stated to be capable of supporting stock for a year without rainfall.

Returning To South Pole

Hear Admiral Byrd Starting Another Expedition Next September

Rear Admiral Richard E. Byrd, speaking at Brockton, Mass., revealed that he plans to return to "Little America" next September. The explorer, who recently sent word to an agent in Europe to find a suitable ship for the forthcoming expedition, definitely said he had chosen next fall as the starting time of his next expedition to the wastes around the South Pole.

Uses Of Silica Spruce

The uses of the Silica spruce are long, straight, of uniform structure, and evenly distributed through the wood, states the Forest Service, Department of the Interior, Canada. These features give it a quality of resonance possessed by few other woods. It is therefore much utilized in the manufacture of organ pipes, piano soundboards, and parts of other stringed instruments.

Dragon flies in prehistoric times had a two-foot wing expansion.

"Ah, I see you can talk American," he said politely.

"Yes," he replied, innocently, "but I can understand English."

A Cautious Service

The United States Post Office Department spends about \$2,000,000 annually on the postal directory service, whose business it is to search city directories and other authorities in order to marry and complete improperly addressed mail.

Canada is the world's second gold-producing nation, South Africa alone being ahead of her.

W. N. U. 1918

BALLOON SPANS OCEAN

William Madrasah, owner of a grocery store at Waterville, with two of the balloons of the type he sent across for advertising purposes last April. Recently Madrasah received a letter from a resident of Edale, Derbyshire, England, in which the writer said he had found a balloon bearing the actor's name and address. The balloon, filled with ordinary illuminating gas, had drifted 3,000 miles across the Atlantic Ocean.

Another Scientific Triumph

Discovery Of One Of Unknown Elements Which Compose Earth

Commenting on the recent discovery of one of the two unknown elements, Prof. Louis M. Dennes, head of the Chemistry Department of Cornell University, described it as one of the greatest scientific discoveries of all time. This, in all probability, will be an exaggerated language to the average man in the street to whom talk of element number 87 is as incomprehensible as Einstein's theory of relativity. Having reached the present period of his life without experiencing discomfort from his personal ignorance of the long-missing element, he was not at all likely to get excited over the recent announcement that it had been traced to its lair by Jacob Papish, Professor of Spectroscopy in the same University, who found it in Samarkandite and calls it a cousin of cesium and rubidium, two rare elements used in photo-electric cells. The new element, however, has not as yet been separated in pure form. Should that ever happen with the facilities presently available, it would probably burn up, Dr. Papish says.

According to the evidence so far as that has been gathered, the element is highly inflammable, insoluble in water and is the most light-sensitive material known at this time. This is the property that renders it so extremely valuable for experimental and scientific purposes and experts are looking ahead for utilization in such ways as coating for photo-electric cells. The mere layman, who depends for illustrations of its character on concrete examples, can more readily understand the position when he learns that the small amount labelled No. 87 in Dr. Papish's laboratory is really priceless with a theoretical equivalent in money far exceeding that of radium.

For the man in the street therefore, however difficult it may be for him to appreciate the value of the find, a very large significance lies in this news just released from Cornell. It reveals also the marvellous competency of the science of the present age. Nor is it science, it may further comfort the man in the street to know, in any way depressed by the extent of the existing depression. Science is certain that the earth has been swinging in space for a long time, and to all appearance will continue to do this for many aeons. Science, like art, is long and economists, exactly with the man in the street, can extract satisfaction from the fact that the scientists are yet anticipating greater days than ever in the privacy of their laboratories. —St. Thomas Times-Journal.

Englishman Gets Most Laughs

An Englishman, it is said, gets three laughs from a joke—first, when the joke is told; second, when it is explained to him; and third, when he understands it. The Frenchman gets only the first two; he never sees the point. The German gets one—he won't wait for the explanation; and the American gets none at all, because he's heard the joke before.

Spoke Both Languages

A Morning Post contributor who had just been to Iceland, was introduced to a charming Icelandic girl who had spent some years in New York.

"Ah, I see you can talk American," he said politely.

"Yes," he replied, innocently, "but I can understand English."

A Cautious Service

The United States Post Office Department spends about \$2,000,000 annually on the postal directory service, whose business it is to search city directories and other authorities in order to marry and complete improperly addressed mail.

Canada is the world's second gold-producing nation, South Africa alone being ahead of her.

Drought Remedy
Is Sought

Saskatchewan Commission Lays Plans For Intensive Study Of Dry Conditions

Saskatchewan's commission on conservation and afforestation, appointed by the Provincial Government, to investigate causes of, and seek remedies for, recurrent drought in the driest portion of the province, laid definite plans for study and research at its final meeting, Saturday, November 14.

Under chairmanship of Hon. J. F. Brynner, K.C., Minister of Public Works, the Commission formally accepted the responsibilities and duties as outlined in the order-in-council appointing it, and later struck committees from its membership to study various aspects of the subject as suggested in a report by Mr. Brynner, of a preliminary survey made by him.

Present at the meeting were: Hon. Mr. Brynner, Chairman; Prof. C. J. MacKenzie, Dean of Engineering, University of Saskatchewan; Dr. W. D. Cowan, M.P., Dr. Patrick, M.D., Yorkton, and Lieut.-Col. P. J. O'Leary, Consulting Engineer, Regina.

Hon. Mr. Brynner, Minister of Agriculture, was the only absentee, being confined to his home by illness.

After discussing the various suggestions arising from the preliminary report submitted by Mr. Brynner, the Commission laid down as its course of action that study should be made of the causes of drought, and the Commission, together with a comparison of similar conditions in other parts of the world, in each case, the steps taken to prevent their recurrence, and the results achieved.

In opening the meeting, Hon. Mr. Brynner outlined the preliminary steps taken to assemble data for the Commission. Numerous reports, books and documents dealing with problems of conservation and afforestation had been obtained from the Forestry Commission of England, the Forestry Commission of Ontario, the State of Nebraska, the different Australian states and from many private individuals.

It was decided that the Canadian National Commission, the engineering data and the services of T. C. Main, a water engineer who had conducted a two-month study of the state of the conservation of water in Western Canada. Acknowledgment was made of the assistance given by Mr. W. MacKinnon, Queen's University, Torgerson, Estevan, and Mr. W. T. Morgan, Estevan, and Mr. W. T. Morgan, Estevan, and Mr. W. T. Morgan, Estevan.

The following committees were appointed to probe the various phases of the problem: Hon. Mr. Brynner, Chairman; Hon. Mr. MacKenzie, Dean of Engineering, University of Saskatchewan; Dr. W. D. Cowan, M.P., Dr. Patrick, M.D., Yorkton, and Lieut.-Col. P. J. O'Leary, Consulting Engineer, Regina.

On Soil Drift.—Hon. Mr. Buckle, Chairman; Dean MacKenzie and Hon. Mr. Brynner. This committee was appointed to ascertain methods of combatting soil drift, with a particular recommendation that it should be a combination of hedge planting with a grass and clover and strip farming technique, in order to make the most possible use of the government's caragana hedge project. To this end, it was suggested that a study should be made of the methods of the United States, which has been given authority to enlist the services of Norman Ross, chief of the Forestry Service, and Mr. A. M. Shaw, Agricultural College, Saskatoon; Prof. L. A. Kirk, Dominion Experimental Station, J. G. Taggart, Superintendent, Experimental Farm, Swift Current, and Mr. A. T. Alty, Professor of Physics, and Dr. Mawdsley, Professor of Geology, both of the University of Saskatchewan, be requested to assist the committee on conservation. Dean MacKenzie assured the Commission that the entire staff and equipment of the provincial university were at its service, as the work was recognized as of vital importance to the people of Saskatchewan and of Canada as a whole.

In handling a resume of proceedings to the press, following the meeting, Hon. Mr. Brynner made the following statement: "The matters to be investigated by the Commission are of paramount importance. It is imperative that a supreme effort be made to solve the problem of drought in Southern Saskatchewan. The people in the affected areas are not at all satisfied under present conditions, dependent every two or three years on the state for the necessities of life. It is not satisfactory from a governmental standpoint, either, as the finances of the state cannot stand repeated drains on the treasury, at frequent intervals, owing to crop failures over a large area of the province. To forget the experiences and lessons of the past two or three years in the wet cycle on which, apparently, we are entering, and to continue in the future the same conditions and methods which have caused drought in the past, is only inviting disaster of a greater magnitude in the near future."

In order to assist in solving the problem, the Commission invites suggestions by way of letters, papers or reports on research along the line of the problems being investigated, from any individual, body, corporation, college or university, within or without the province, as a piece of voluntary service. All such communications should be addressed to the Chairman of the Commission on Conservation and Afforestation, Legislative Building, Regina, Sask.

Reported That They Are Preparing To Discard System Of Rationing

The Soviet Government is preparing to discard the famous Communist system of rationing food and clothes, it was reported from Moscow.

All retail shops will be thrown open to the public as in capitalist countries except that there will be fixed prices under stringent official control, persistent reports said.

Ration cards, which extend privileges to Communists and workers and impose restrictions on foreigners and many thousands of others charged with hostility toward the Soviet Regime, would be abandoned. All purchasers would be admitted to the stores.

Defective Automobiles

Moving At Safe Speed Are Source Of Danger

An automobile with poor brakes may be more dangerous operating at 25 miles an hour than a car with reliable brakes operating at twice the speed. To the pedestrian a defective car moving at what seems a safe pace is a source of added danger because the car in truth is out of control. The fact is that the driver of a mechanically imperfect car is guilty of criminal negligence, and he ought to be punished accordingly if his care does injury to persons or property.

The Canadian Rockies, where scores of peaks rise over 10,000 feet in height, presents to the mountaineer one of the world's most interesting and extensive fields.

Map Used By Columbus Will Be Disclosed To World

The map on which Christopher Columbus traced his third voyage to America is about to be disclosed to the world by permission of the Turkish Government after being secreted in the Janissary Museum in Istanbul for four centuries.

The document left under Turkish hands when Admiral Kemal Reis, who dominated the Mediterranean in the 16th century, captured a Spanish sailor who participated in Columbus' third voyage and had the map in his pocket. It found its way to the Turkish Museum where its value was undisputed until a German savant discovered it in 1929.

To facilitate speedy handling of British air mail, thirteen special post boxes have been set up in London, England, and similar boxes are to be placed in other cities.

ACTOR: "Woman—woman—what have you done?"

CRITICAL BOY: "He called 'er woman' twice."

SECOND BOY: "Well, look at the size of 'er!"—The London Opinion, England.

Christmas Seal Sale
PROVIDES FUNDS FOR
Fight Against Tuberculosis

Ideally located amid surroundings of Qu'Appelle Valley, Saskatchewan's first Tuberculosis Sanatorium is an institution of which this province has no reason to feel proud as are its two sister institutions, located at Saskatoon and Prince Albert. In these, close to 800 patients are under constant treatment and as a result of the efficient management in the fight against tuberculosis is being waged the death rate remains at a low figure. In Saskatchewan, the lowest of any province in the Dominion and just over half that of the average for Canada as a whole. In Saskatchewan there are 46 deaths per 100,000 of population while in Canada there are 81 deaths per 100,000. Last year there were 407 deaths from tuberculosis in the Dominion and 1,100 in Canada. Tuberculosis is still the greatest cause of death during the first thirty years of life, causing one out of every five deaths during this age period.

Funds for the maintenance of Sanatoria and the payment of patients are provided by taxes and the knowledge that during these difficult times all unfortunate sufferers are being taken care of is comforting indeed. But in spite of all that is being done the loss, both in life and unemployment, from tuberculosis is staggering. In Saskatchewan an equivalent of one funeral every day and two every Sunday occur as a result of this disease. And more than the number under treatment in our Sanatoria are convalescing in their homes and are still unable to work. The period of total disability from the disease averages about two years per person.

Education regarding tuberculosis is essential for the control of the spread of this dread disease. And never was there for education greater than at present, as it is during times of depression, when a portion of our people are unemployed. The old saying, "prevention is better than cure" applies with particular force in this connection. Preventive work is the most important phase of anti-tubercular work and this is financed by voluntary contributions of a few generous people. The sale of Christmas seals is the chief source of revenue for educational and preventive work. The old saying, "prevention is better than cure" applies with particular force in this connection. Preventive work is the most important phase of anti-tubercular work and this is financed by voluntary contributions of a few generous people. The sale of Christmas seals is the chief source of revenue for educational and preventive work.

The result has been, Lord Bessborough continued, an unbelievable development of the Empire as a whole. "The very fact that its several members are attaining a stage of development of a few generations ago, is a sure proof that the whole is sound." Yet within the Empire, there is no room for "sleeping partners."

Each member-nation owed an obligation to the Empire as a whole. Lord Bessborough proceeded.

Canada's Arctic Airways

Important Factor In Transportation Business Of The Far North

Within the past three years the aeroplane has established itself as a factor in the transportation business of the Far North, according to the North West Territories and Yukon Branch of the Department of the Interior. Today well equipped commercial airlines companies operate in the Mackenzie and Keewatin Districts. The planes that pioneered the Arctic airways followed the well established routes of river and coastal travel, but experience has now shown that much of the Arctic coastline is better served by cross country routes. From Coronation Gulf west the several routes leading northward are based on Great Slave Lake. From this base three recognized routes are followed, one to Alert by way of the Mackenzie River, a second to Coppermine via Rae, Great Bear Lake and the valley of the Coppermine River, and a third from Reliance across country to the southern end of Bathurst Inlet. The district of Keewatin is served by Winnipeg and The Pas, Manitoba, the route followed being the Nelson and Churchill Rivers and the western coastline of Hudson Bay.

Canadian Gold Mines Playing Vital Part In Maintenance Abroad Of Our National Credit

When leading economists and bankers declare that Canadian gold mines are playing a vital part in the maintenance abroad of our national credit; that at home they are aiding materially in the return to prosperity; that there are excellent grounds for Canadians to view the future with optimism. Never in the history of the industry have our gold mines been more capable of shouldering so heavy a responsibility.

Our mines are now producing over a million dollars of gold weekly, the highest rate achieved since the inception of gold mining on a commercial scale in Canada seventy-three years ago, and increases beyond this point are assured by expansion programs under way. These sufficiently close to the picture will not be surprised to see Sir John Aird's prediction of \$100,000,000 a year realized well within the ten-year period conservatively allowed.

In its growth to one of the great mining countries of the world Canada is fulfilling early promise. A companion of Champlain discovered silver, copper and iron in Nova Scotia as far back as 1604. The Indian had previously found copper, and John Pelly found and mined gold. But the first commercial mining of gold which there are records, was ushered in with the discovery in 1858 of the famous Fraser River deposits in British Columbia.

From that time forward our gold mining industry met with varying fortunes, production during the period from 1858 to 1912 seeing many ebbs and flows consequent upon the development of discoveries in British Columbia and the Yukon. Gold has now been discovered in every province of the Dominion with the one exception of Prince Edward Island. At times annual gold production fell below a million dollars, at other times the three lowest states of the world. This at the peak the total reached \$28,000,000, of which Yukon accounted for \$22,000,000. This record stood for twenty years, until, in fact, seven years ago.

With the discovery of Porcupine in 1909 and Kirkland Lake two years later a new and more brilliant era was commenced. Three years after Benny Hollinger, Sandy McIntyre, and Jack Wilson staked the Hollinger, McIntyre and Dome Mines, Ontario gave the first signs of coming greatness in a gold mining sense.

The possibilities of new mines being developed are conceded by those familiar with our mineralized areas to be immeasurably better than any other country in the world. This statement finds international support in the conclusions of the Gold Delegation of the League of Nations. This body, after due consideration, credited Canada with estimates of a rising scale of output over the next decade. Declines in the same period were predicted for all other countries.

Some idea of the benefits conferred on Canada by reason of the sensational development of gold mining in recent years can be gained from the fact that a million dollars worth of gold production is being infused into the sluggish arteries of commerce. It is a well known fact that a large proportion of receipts goes for payroll and supplies. A well-known banker who knows mining from long association in the North has estimated that every dollar spent in gold mining is multiplied twenty-five times as it courses through commercial channels.

From the standpoint of dividends our gold mines have built up a record of which any Canadian may be justly proud. Ontario gold mines alone, to the end of last year, had distributed to stockholders some \$105,000,000. In the current year, with general industry operating so largely "in the red" Canadian gold mines will show a substantial increase in dividends to approximately \$150,000,000. Ontario's share of this large sum will be about 94 per cent. One Ontario mine, Lake Shore, is distributing to its stockholders this calendar year, \$4,800,000, an amount equivalent to more than one-quarter of the total dividends of Canadian chartered banks for the same period.

The importance of our gold mines to Canada at this critical juncture is perhaps most graphically illustrated by the fact that the current year's production of gold will pay the annual interest on a billion dollars of foreign debt without disturbing our trade balance or impairing the position of the Canadian dollar on foreign exchanges.

By the close of 1934 the Canadian output of gold will reach \$1,000,000,000.—St. Catharines Standard.

Many Dialects Noted In English Language

Everyone Has At Least Three Vocabularies, Claims Professor

English "as she speaks" may be after all just what the speaker makes it.

Dr. Frank Parker Day, president of Union College, says English-speaking persons do not all speak the same language. Addressing a student gathering at Schenectady, he noted national, sectional and individual differences in a language used by 180,000,000 people. He found that the language has advanced by leaps and bounds "in the mouths of children and fools."

"We each have a speak," said Dr. Day, "an individual language that is slightly different in form, meaning and intonation from the language of any other individual. That is dependent upon the structure of our vocal organs, the climate we have lived in, our general environment, our experiences, our reading and our native intelligence."

Moreover said Dr. Day, each individual has three or more vocabularies that he employs in accordance with what he feels to be fitting under certain circumstances and on certain occasions. But no conscious effort is made in changing these sets of words, he said.

He described them as a simple vocabulary for old friends, such as one-time farmers or fishermen return to another set of words implying affection and regard and used with one's family and intimate friends; a third, "perhaps a little stilted," used when the speaker wishes to be formal and dignified. In writing, he said, there is sometimes used a fourth vocabulary in which "book words" perhaps never used in either speech or familiar conversation appear.

"But beyond these four vocabularies," he said, "we all have a fifth that we seldom and perhaps never employ, because we deem the words unbecomingly and unworthy, but which we will find if we honestly search our minds."

"How could you and I," he asked, "have precisely the same language? Not only do we have an interesting and individual linguistic history, but if we are clever enough and our ears are keenly enough attuned, we can recognize these qualities in another. Of course we all can do this in a rough way; we can distinguish the Englishman, the Canadian, the Yankee, the Southerner, and so on."

A language is strong or weak, he said, in accordance with the strength or weakness of the race that speaks it. Had the Roman Empire lasted a few centuries longer, Dr. Day continued, Britain would be speaking a romance language similar to the French or Spanish of today.

Canadian Eggs For Export

Considerable Increase Shown In Estimate For This Year

It is estimated that this year 20,000 cases each containing 30 dozen eggs, will be exported to Great Britain from Canada. This marks a considerable revival from the exports in 1930 which totaled approximately 6,500 cases. Already over 8,000 cases of eggs have been shipped to Great Britain from British Columbia via the Panama Canal. The remainder of Canadian exports, originating in the Prairie and Eastern Provinces, will be shipped from Montreal before the end of November. Whether shipments are made by the short water way from Montreal or by the longer route through the Panama Canal, the eggs arrive in Great Britain in first class condition.

In order that the quality of Canadian eggs may be fully dependable at time of export all shipments are required by law to be graded according to Canadian standard grades of quality and inspected by Dominion Government inspectors before shipment.

The per capita yearly consumption of eggs in Canada is approximately 372, or more than one egg per day, every day of the year.

Still In Style

The "old-fashioned girl" apparently hasn't gone out of style after all. The Daily Northwestern, student publication, conducted a survey and found that 80 per cent of the men specified that they were not enthusiastic about girls who smoke, drink intoxicating liquors, or overdo the use of rouge and lipstick.

Privileges For Prisoners

Among privileges now allowed to prisoners in certain British jails are weekly dancing classes, animal pets, fitted gymnasiums, educational talks by radio, and excursions in shorthand and foreign languages.

Two birds with one stone is expected, but one bolt of lightning at 1,500 of them. The bird sparrows, were perched on an electric light wire when the lightning struck it.

Improved Trade Conditions

Hon. H. H. Stevens Points To Gains In Industry

Continuing his Canada-wide campaign of optimism based on facts, Hon. H. H. Stevens, Federal Minister of Trade and Commerce, poured out a new salvo of favorable statistics in addressing the Canadian life insurance officers in convention at Toronto. Industries which had shown substantial gains in the last year, he said, were: Woolens, 13 per cent; thread, yarns and cloth, seven per cent; leather and footwear, seven per cent; also silk, textiles, construction pulp and paper, printing and retail business.

The country's adverse trade balance had been reduced \$65,000,000—from \$89,000,000 to \$24,000,000—during the year ended Sept. 3 last.

There had been a favorable trade balance of \$12,000,000 for the last four months of that year.

New construction in Canada for the first ten months of 1931 had totaled in value \$280,000,000, of which \$71,000,000 represented new homes.

"It will therefore be realized," said Mr. Stevens, "that while the world has been passing through a period of hardship and suffering, we in Canada can at least say 'it might be very much worse.'"

The 1931 Crop

Estimated Crop For Canada Is Now Placed At 298,000,000 Bushels

Estimate of 298,000,000 bushels for this year's wheat crop in Canada is contained in the current business letter of the Bank of Montreal. This is 26,000,000 bushels above the September estimate, although 100,000,000 bushels below the crop of 1930. The estimated total includes 19,000,000 bushels of wheat grown outside the prairie provinces.

"An upward turn in the price of wheat has come," the letter says, "market quotations having risen about 15 cents a bushel within a few weeks, a movement that has quickened marketing and infused a more hopeful feeling in western business circles," says the report.

Very Well Explained

Woman In London Police Court Proved Her Case

Flashes of real wit, unconscious humor and homely philosophy sometimes emanate from the police courts of Old London, and under the last-named category comes the obituary of a woman at Tottenham. Domestic relations were under consideration and the magistrate asked: "Why do you think your husband has tired of you?"

Quick as a flash her answer came: "Well, he spends more time in his garden, and he never thinks to bring me a rose."

The whole case against neglectful husbands could not have been better put if she had written a volume.

Primitive Illumination

Indians In British Columbia Still Use Candle Fish

The candle-fish or colichan is still being used by the Indians in some parts of British Columbia for illuminating purposes. After catching the candle-fish the Indians place them in a dry sheltered place, and wait till they are shrunken and all the water has evaporated from them. They then set the head or tail of the fish alight, and use the carcass as they would a torch. There is so much oil in the carcass that it provides a bright steady flame which burns slowly.

Entomologists Meet

A. J. Mitchener, Manitoba Agricultural College; Prof. E. H. Strickland, University of Alberta, and R. Glendening, Dominion Entomological Laboratory, Agassiz, B.C., were elected among the directors of the Entomological Society of Ontario at closing sessions of its annual meeting at Guelph. Dr. W. H. Brittain, MacDonald College, Quebec, was elected president.

Machine-gate methods are now used in the large vineyards of northern Africa.

FASHION.

No. 301—Smart Tailoredness. This style is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 459—Jaunty Combination. This style is designed in sizes 14, 16, 18, 20, 22, 24 and 26 inches bust measure. Size 14 requires 1 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 505—For Wee Maids. This style is designed in sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 491—Boudoir (Flapper) Dolls Cloven Suit, consisting of a slip-on blouse, trousers and cap. Cuts in one size only and requires 1 1/2 yards of 39-inch light and 1/2 yard of 39-inch dark material.

No. 658 Smart Simplicity. This style is designed in sizes 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

No. 653—A Smart Tailleur. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Plant Experiments

New Varieties Of Plants May Be Introduced Here With Profit

Supporting the opinion of Dr. McConeky, formerly of the Ontario Agricultural College, that Canada may profit from further research into Russian grass plants, Professor Manley Champlin, head of the Field Husbandry Department of the University of Saskatchewan, commented on work of this nature that has already been done and said that many more plants might be found that could be introduced into Canada to her profit.

He said that as a result of the research of Dr. N. E. Hansen, of South Dakota, and the late Mark A. Carlton of the United States Department of Agriculture, many varieties of grass plants have come to Canada. Notable among these are the caragana hedge plant, broom grass, crested wheat grass, Arctic sweet clover, and several varieties of Durum wheat.

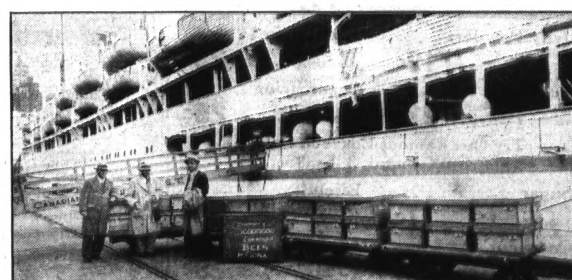

A Likely Response

Commenting on the prevalence of slang, the Governor-General of Canada, speaking at Ottawa, made the statement that "our language is a glorious inheritance, a heritage worth preserving." The popular response, no doubt, will be that the language is "A-I" and the Governor-General "O.K."

In the 11 far western states, motor vehicles average about 500 miles a year of travel greater than cars in the other states.

CANADIAN BEES FOR ORIENT

California's tallest redwood tree measures 364 feet.

The Orient war zone could inflict as much damage as half as many soldiers, or whether or not a bee is capable of stinging more than once were some of the speculations heard from a crowd of interested watchers while the loading was in progress.

Whether 10,000,000 bees, loosed in

producers in the British Empire. Mr. Reidel has already shipped two consignments of bees to China from his California apiaries, and is now taking leave of absence for five years, during which time he will demonstrate Canadian and American methods of bee culture in the Orient.

In the picture, from left to right, are Grover Reidel, breeder; Winfred Dean, Italian queen-breeder; and George Reidel, breeder and shipper.

Radium Discoveries Made In Western Canada May Prove To Be Of Great Significance

New Turnip Grades Issued At Ottawa

Amendments To Government Regulations Are Very Important

An important amendment to government grades for Rutabagas, or table turnips, has been brought into effect by order of the Minister of Agriculture, promulgated in the current issue of the Canada Gazette.

The experiences of the past season showed that while an important step in the right direction had been made in the grading of table turnips, the grades should be modified so as to better suit market demand. Only one quality of turnip, Canada No. 1, is recognized in grading and this is classified by size to meet market preference. For example, the Philadelphia market, which imports large supplies from Canadian growers, shows a marked preference for a turnip of good quality sizing from 2 inches to 4 inches in diameter, while the New England market prefers a medium-sized turnip, from 4 inches to 6 inches in diameter.

A careful survey of the whole situation established the facts on which the modification of grades was made, and the changes were submitted to and enthusiastically approved by growing, shipping and marketing interests before being put into effect.

Perhaps the most important change is in the introduction of the term "shaggy." As applied to turnips, it means a turnip which is one and one-half times as long as its diameter. In determining this feature individual measurements of many thousands of turnips from representative fields were made.

Each of the four table turnip grades have the same specifications for quality; they must be firm, shaggy and properly trimmed, practically free from damage caused by blight, freezing, water core, soft rot, dry rot, worms, grubs, growth cracks or mechanical means. Otherwise the diameter determines the grades, which are:

Canada No. 1, small, 2 inches to 4 inches; Canada No. 1, small medium, 3 1/2 inches to 5 inches in diameter; Canada No. 1, medium, 4 inches to 6 inches in diameter; and Canada No. 1, large, not less than 4 inches in diameter.

Canadian Exhibit Carries Off Honors

Apples and Honey At Imperial Fruit Show Receive Awards

Right on the heels of news of better conditions in Britain following the elections comes the interesting information that Canadian apples and honey have begun to reassert their supremacy and make official appeal to all who like good things to eat. At the Imperial Fruit Show in Manchester, held recently, the Dominion exhibit, the eastern side of the Dominion, had the best Cox's Orange, King, Golden Russet, Spys, Greenings, Gravenstein and Baldwin. This indicates that the British public is being informed regarding the almost bewildering variety, as well as the excellence of Canadian apples.

In the honey section there was even more success. Competing in three sections open to all Dominions and colonies, Ontario exhibitors won two first prizes, and those from British Columbia won first, second and third prizes. This success is certain to attract the attention of British consumers, and should lead to an increase in the Dominion's export of honey.

A government expert demonstrated how the process revealed the cancellation figures which had been erased from the stamps. Blaney was charged guilty of using 29 stamps which had been used before.

A Rare Discovery

Five Hitherto Unknown Musical Compositions Of Haydn Brought To Light

Five hitherto unknown compositions of Joseph Haydn, famous composer, have been discovered by Dr. Karl Geringer, custodian of archives of the Vienna Society of the Friends of Music, and are now being published.

According to Dr. Geringer, the compositions rank with the master's finest works. The manuscripts include two nocturnes in "F" and "C" major, with orchestral accompaniment. The principal melody was intended to be carried by the "lira organista," an obsolete Neapolitan instrument resembling a guitar.

A new plastic material made of sugar is unburnable, and is expected to be valuable therefore in X-ray and photographic films.

Near Great Bear Lake, in the wilds of the Mackenzie district of Canada, mining engineers have been striking pits into some recently discovered deposits of pitchblende. Working in several extensive veins that run beneath small lakes in the district, miners have dug out enough ore to yield forty tons of pitchblende. So valuable is this ore considered, according to Industrial and Engineering Chemistry, that half of the mined material has been carried to the nearest railroad by airplane.

The report goes on to say that "the twenty tons which have been brought out will yield from two to two and a half grams of radium. The richness of the ore, together with the low cost of mining it, indicates that here, at last, is a deposit well able to match itself against those in South Africa." The reference here is to the production of radium salts from ores mined in the Belgian Congo and also in a Belgian mining concern as one of the world's important sources of radium. According to the report quoted, these rich foreign resources constitute a threat to those working with poorer ore.

Discovery of the Canadian deposits of pitchblende may have consequences of profound significance to industry and to medical science. If the ore is properly mined and marketed, it may prove to be a North American source of radium salts rich enough to provide much larger supplies for scientific and therapeutic use than price set by foreign interests now make available. Pitchblende is not the only known mineral containing uranium—and, therefore, radium—but it is one of the most valuable ores mined for that purpose.

Characteristically, the story of this scientific triumph forms a research narrative prepared by Professor Gilbert E. Doan, of Lehigh University and issued by the Engineering Foundation a few days ago. It is a coincidence that the story should be reminded of this newly discovered power of radium within a week of the announcement of recent progress at the pitchblende mines in Mackenzie.

The method by which engineers may now test sheets or beams of steel for hidden defects by the use of gamma rays is extraordinarily simple. It was first revealed to the world in September, 1930, by physicist of the Naval Research Laboratory in Washington. The process is somewhat similar to X-ray photography. Placing a tiny capsule of radioactive substance on one side of a twelve-inch steel girder, for instance, engineers pass a film photographic plate against the other side. The resulting picture discloses even small flaws in the interior of the metal.

One great advantage of this process of X-ray testing is that all necessary equipment may be carried about in a handbag—carried, as Professor Doan says, "into a submarine, to the top of a skyscraper, into a machine shop or foundry, anywhere that a large object may need examination." Of course the most serious drawback to the extensive use of such a method is the high cost of radium, but this situation may be altered in time by further discoveries of natural resources such as the pitchblende deposits found in Canada—New York Sun.

Can Detect Renovated Stamps
How renovated used stamps may be detected by use of violet rays and an acid was told during the trial in Lurgan, Ireland, of John Blaney, charged with using old insurance tax stamps. A government expert demonstrated how the process revealed the cancellation figures which had been erased from the stamps. Blaney was charged guilty of using 29 stamps which had been used before.

All He Had

The bridegroom had no visible means of support outside of his father yet it was a very fashionable wedding.

Preacher: "Repeat after me, 'With all my worldly goods I thee endow.'"
Bridegroom: "With all my worldly goods I thee endow."
His father (loud whisper): "There goes his bicycle, Martha."

Ancient Damascus blades, traditionally referred to as superior and apocalyptic weapons, were really made of steel not so good as that produced today.

Feather wings flapped by a gasoline motor propel an Austrian inventor's bicycle.

Creditor: "I will not leave your side until you have paid me."
Debtor: "A companion for life at last."—Friedrich Schiller, Munich.

Some men thirst all their lives after fame, others after love, and others after money.

"But I know something that all men thirst after."
"What is that?"
"After salt herrings."—Karlatur, Oslo.

LACOMBE POULTRY AND PET STOCK ASSOCIATION

Show Dec. 29-30

SPECIAL PRIZES

Gillespie Grain Co., Edmonton, Alta.
4 25 B. sacks of Gillespie Mail
Chick Starter. To the best display
of Plymouth Rocks, Wyandottes,
Orpingtons and Rhode Island Reds
in the Novice Class.

Lacombe Nurseries, Ltd., Lacombe,
\$200 worth of Nursery Stock for
the Best Bronze Turkey Tom in
Show. \$100 worth of Nursery
Stock for the best Bronze Turkey
Hen in the Show. \$50 worth of
Nursery Stock for the best pen of
Bronze Turkeys in Show.

S. J. Henderson, Lacombe, Alta.
2 Barred Rock Cockerels valued
at \$10.00. For best Male and Best
Female birds in Show, Barred
Rocks.

1 sack of flour, 100 lbs. For best
pair of Geese, (Male & Female).
F. E. McLeod, Lacombe, Alta.
100 lb. sack Chicken Scratch. For
best pair light variety Birds (Male
& Female).

D. Cameron, Lacombe, Alta.
1 Shirt, value \$2.50. Best pair
Asianic Birds (Male & Female).
Pratt's Garage, Lacombe, Alberta.
1 Goodyear Heavy Duty Inner
Tire 29 x 4 1/2 or equal value. For
Best pair Ducks any variety (Male
& Female).

Imperial Lumber Co., Lacombe, Alta.
Goods to the value of \$2.00. Best
Pair Bantams in Show (Male and
Female).

Lacombe Furniture Co., Lacombe,
Picture, value \$1.50. Best pair
Brahmans in Show (Male & Female).
B. S. Cameron, Lacombe, Alta.
Enlarged Picture from own Film
8 x 10 with frame. Best Exhibit
by a Lady in Show.

Parson's Bros., Lacombe, Alta.
Goods to the value of \$2.50. Best
Bird in Novice Class (heavy).
Hop Chung Cafe, Lacombe, Alberta.
1 Box Cigars. Best bird in Novice
Class (light).

Joe Edgington, Lacombe, Alberta.
Goods to value of \$1.00. Best
Deer Eggs (White).

Star Cafe, Lacombe, Alberta.

Box Chocolates. Best Dozen
Eggs (brown).

Sage & Saunders, Lacombe, Alberta.

5 gals. Gasoline. Best pair light
Sussex Birds (Male & Female).

Jenkin's Grocery, Lacombe, Alta.

100 lbs. Flour or 25 lbs. Prunes or
1 box Apples. Best pair Dressed
Chickens (heavy).

A. M. Campbell, Lacombe, Alta.

Goods to the value of \$2.50. Best
pair of Dressed Chickens (light).

G. Murdoch & Son, Lacombe, Alta.

2 settings Barred Rock Hatching
Eggs or 3 doz. Commercial Eggs.
For Boy or Girl's Best Exhibit of
Barred Rocks.

S. M. Murray, Lacombe, Alta.

6 Cups and Saucers or 1/2 doz.
Spoons. Best pair Polish Birds,
(Male & Female).

Magnet Store, Lacombe, Alberta.

1 Box Fancy Apples. Best display
of White Leghorns in Show.

N. Campbell Co., Ltd., Lacombe, Alta.

Dry Goods to the value of \$2.50.
Best pair Langhans (Male and
Female).

Atlas Lumber Co., Ltd., Lacombe.

1/2 gallon Paint. Best pair White
Wyandottes (Male & Female).

D. Hay, Lacombe, Alberta.

Goods to value of \$2.50. Best pair
Jersey Black Giants (Male & Female).

Rainbow Cleaners, Lacombe, Alberta.

Clean and press Suit of Clothes or
Dress. Best Canary in Show.

City Meat Market, Lacombe, Alberta.

Goods to value of \$2.50. Best
pair Rabbits in Show (open class).

Park's Garage, Lacombe, Alberta.

Change of Winter Oil. Best \$2.00.
P. Pen of Birds in Show.

Spillers Ltd., Calgary, Alberta.

1st. 100 lbs. Vico Laying Mash.
2nd. 50 lbs. Vico Laying Mash.
3rd. 25 lbs. Vico Laying Mash.
Best display of Poultry in Show.

Burns & Co., Ltd., Calgary, Alberta.

100 lbs. Ground Bone Dry. Best
Turkey Male or Female any variety
in the Show.

Swift Canadian Co., Ltd., Edmonton

3-100 lb. sack Laying Mash.
Scraps. Best Pen of Heavy Birds,
Best Pen in Light Birds. Best
Pen of Birds in Novice Class.

A. Gilmour, Lacombe, Alberta.

1-10 lb. tin Lard. Best Duck
in Show (Male or Female).

Feed and Supply Co., Ltd., Calgary.

100 lbs. Laying Mash. Best Goose
in Show (Male or Female).

Dr. Hess & Clark Inc., Ashland, Ohio.

50 lbs. Dr. Hess Poultry Pan-O-
Min. Best Production Bird in
Show.

LACOMBE SEED FAIR AND
SEED JUDGING COMPETITION

A Seed Fair and Judging Competition
will be held in the Church Hall,
Lacombe on Tue. & Wed., Dec. 29
and 30 the auspices of the Lacombe
Agricultural Society. The object in
holding this Fair is to locate and
advertise good seed grain in the district.
Following is the Prize List.

Wheat—50 lbs. required.

Class 1—Spring wheat, any good
milling variety.

Class 2—Registered spring wheat,
Class 3—Spring wheat, early varieties
Reward, Garnet, Red Bob, etc.

Class 4—Spring wheat from any
field entered in a Standing Field
Crop Competition in Lacombe District.

Class 5—Winter wheat, any hardy
variety.

Class 6—30 lbs. Grain Required

Class 7—Oats, Banner type.

Class 8—Oats from any field entered
in a Standing Field Crop Competition

tion in Lacombe District.

Barley—40 lbs. Grain Required

Class 9—Six Rowed Barley.

Class 10—Two Rowed Barley.

Miscellaneous:

Class 11—50 lbs. Winter Rye.

Class 12—50 lbs. Spring Rye.

Class 13—30 lbs. Field Peas.

Class 14—20 lbs. Timothy Seed.

Class 15—10 lbs. Brome Grass Seed.

Class 16—20 lbs. Rye Grass Seed.

Class 17—30 lbs. Red Clover Seed.

Class 18—20 lbs. Alsike Clover Seed.

Class 19—20 lbs. Alfalfa Seed.

Class 20—20 lbs. Sweet Clover Seed.

Class 21—40 lbs. any named white
varieties of potatoes.

Class 22—40 lbs. any named red
varieties of potatoes.

Class 23—10 ears white Corn.

Class 24—10 ears yellow Corn.

Vegetables any Variety.

6 Turnips.

6 Head Cabbage.

10-Carrots.

10-Parsnips.

Liberal entries will be given.

The following requirements are
necessary for the Provincial Seed
Fair, but not applicable to the local
competition:

"A certificate of germination and
purity must be attached to all ex-
hibits of grasses, vegetable and flower
seeds. Germination certificates
can be secured by sending sample of
exhibit to Dominion Seed Branch, Cal-
gary.

For further information phone
Town Hall Phone 49, Secretary of
the Seed Fair.

TOWN OF LACOMBE

Tenders For Purchase of Old Building

Tenders for the purchase of the old
building used as a garage and store-
house situated on lot 17, Block 11,
Plan 1A, Nanton Street, immedi-
ately North of the Atlas Lumber
Company, will be received by the
undersigned up to noon December
28th. Terms of sale, cash, and build-
ing to be removed or demolished with-
in 60 days.

L. P. Minkler,
Secretary-Treasurer

CO-OPERATIVE CREAMERIES

WIPED OUT

Another powerful argument against
people embarking in enterprises for
which they are not trained, is the
fact that the Saskatchewan Farmers'
Co-operative Creameries report an
operating loss of \$1,671,242.

Mr. Minkler, secretary of the
co-ops, is advising that not only
the entire capital stock of
\$1,392,278 is wiped out, but in addi-
tion there is a deficit of \$378,964.

GET HER A DOLL

The Western Globe still has a few
dollars left which will be given away
FREE with one year's subscription
—either new or renewal. They won't
last long, so come in today.

OUR COMMERCIAL LEAGUE

Many fans of Lacombe and dis-
trict are not aware of the fact that
they are missing a lot of real good
hockey. The Lacombe Commercial
League have regular games on each
Monday night—and take it from us,
nice brand of hockey is played. This
league, which is under the able lead-
ership of Mr. Chas. Bristow, who, by
the way is a veteran hockey player
—one of the first members of the
A.A.H.A. is certainly getting away
to a good start. Aside from the local
league, matches are arranged with
teams from the surrounding villages
and districts. Many good players
developing in these weekly games
and regular practices, and some of
these players, will sooner or later
be drafted into the senior ranks. Be-
sides being a training ground for
many youthful players, this league
proves a great benefit to older play-
ers who are not on the senior lineup
and still want to play hockey. The
Monday night games are played un-
der expert referees and played strict-
ly according to rules, so that budding
players know their stuff to perfection.

The two games last Monday night
demonstrated very forcibly to the
fans present that the four teams
which played that night turned in a
brand of hockey that was as good as
that played by first teams in many
towns in Alberta.

The first game which was a com-
mercial league fixture between the
Clerks and the Mechanics was a good
one, and although the Clerks took
the Mechanics into camp to the tune
of 8 to 3 the game was not nearly so
one sided as the score would indicate.
Plenty of fast hockey was played
and although the Clerks were in the
lead most of the time, the Mechan-
ics did not throw in the sponge—but
played like demons right till the end
of the game.

The game between Bentley and the
"Rink Rats" was a good one, and
the rink rats proved too many for
the Bentley aggregation, beating
them 4 to 0. Bentley has a good
lineup, and should develop into a
good, fast team. They were handi-
capped to a certain extent by the
fact that their rink was only com-
pleted recently and their team inci-
dentally out of practice—we are sure
that with a few more practices that
Bentley will be able to play hockey
that will be hard to beat. The
Mechanics have a real good lineup,
and many fast players are showing
up.

Now, hockey fans, turn out next
Monday to these league games and
give the local boys the encourage-
ment they are entitled to. They will
give you a good evening of hockey
and your 25c. will be a great help
to the league in supplying sticks and
other hockey requirements. Re-
member, there are two games every
Monday night, each of which are

worth 25c. of anybody's money—and
it will cost you but 25c. to see both
games. Watch the sign boards for
announcement of the teams to play.

EMERGENCY RELIEF

In connection with the National
Emergency Relief appeal, a second
meeting was held in the Town Hall
on Saturday afternoon, December 12.
Attending this meeting were Mayor
G. T. Jackson; Secretary, L. P.
Minkler; Rev. R. B. Layton, M.
Crishabank, C. A. Smith, A. Bel-
cher, J. S. McCormick, H. Tranno,
Jesse Fraser, W. Parker and repre-
sentatives from various school dis-
tricts.

Plans were formulated at this meet-
ing for completing the canvass
throughout the Town and Municipal-
ity, and Mayor G. T. Jackson,
Chairman and Mr. L. P. Minkler,
Secretary-Treasurer, were appointed
a sub-committee (with power to add
to their number) to have general
supervision over the entire territory
and to receive all subscription lists
and monies received. A resolution
passed unanimously that the Towns
of Lacombe and Blackfalds organize
their own canvass and that School
Boards of the Rural Districts co-
operate with the teachers with the sug-
gestion that the school children be or-
ganized as canvassers for their dis-
tricts. It was also felt desirable
that this canvassing be done as early
as possible and the subscription lists
and funds collected be turned in to
the Secretary-Treasurer, Mr. Minkler
by December 25th or as soon after as
possible. All school board Secretaries
are to be notified immediately
of the decisions reached at this meet-
ing and it is hoped they will take
prompt, definite action in the terri-
tory under their control.

In Lacombe, it is hoped to secure
three C.G.I.T. groups to make a
house-to-house canvass of the resi-
dential district, while a committee
of men and women will solicit both
the business section and the adjacent
school district. Farmers will please
take note that donations of grain,
butter, eggs or cream may be given
in place of cash. Arrangements have
been made with the local elevators
and creamery to take care of such
subscriptions.

A meeting of the local Central
Relief Committee will be held in the
Town Hall on Saturday afternoon at
3 o'clock, Dec. 19th to make ar-
rangements for Christmas Cheer
baskets, for children.

LAKEVIEW

Lakeside Christmas Tree and En-
tertainment will be held in the School
House on Monday evening, December
21st at 8 o'clock. A good program
is assured.

STOP USING SODA!

BAD FOR STOMACH

Much soda disturbs digestion. For
sour stomach and gas. Adulterated
fat better. One dose will rid you of
bowel poisons which cause gas and
bad sleep. Sweet's Pharmacy.

THURSDAY, December 17, 1931

SUNDAY SKATING

There is skating every Sunday af-
ternoon in the Lacombe rink. This
gives an opportunity for those who
are not able to skate on the regular
skating nights. Ticket holders and
others are merely asked to contrib-
ute to a silver collection which is
taken at the door. Up to the present,
very few people are taking ad-
vantage of this afternoon's skating
and as the expenses of operating the
rink are quite high, the management
will find it necessary to discontinue
Sunday skating unless more skaters
attend.

AT THE AVALON

"Skippy"

A treat for boys and girls—from
three to a hundred and three. You'll
laugh—with a tear in your eye as
this intensely human story of boy-
hood unfolds for you the real thrills
of youth. It reaches down deep into
your heart and stirs long forgotten
memories. His hilarious small boy
philosophy, his rollicking experience
across the track in Shanty town. The
kid brays involving Skippy and his
pall, Sooky, their scraggly dog, "Penny." A better picture than
"The Kid" or Tom Sawyer with an
all star cast! Jackie Cooper with his
serious old man look bubbling from
boyish features. Robert Coogan,
Jackie Searl, Enid Bennett and oth-
ers. This picture has a four star
rating, the highest awards given any
picture, meaning "Extraordinary".
Coming—Marie Dressler and Wal-
lace Berry in "Men and Bells," Dec.
24th, 25th and 26th.

Douglas Fairbanks in "Reaching
for the Moon," Dec. 31, 1st and 2nd
January.

LAST WE FORGET CLUB

From the sale of poppies, this club
was able to send \$25.00 to the
Soldier patients in the University
Hospital, Edmonton and buy bedroom
slippers as Christmas Gifts. \$25.00
was also sent to the Colonel Belcher
Hospital, Calgary, to buy comforts
for the invalid Soldiers there.

A vote of thanks was given to the
members of the Legion for their kind
entertainment of the ladies of this
Club on Friday evening last, at a
card party.

A. M. CAMPBELL'S

THE ALBERTA SHEEP INDUSTRY

There are about 520,000 sheep in Alberta. In some places small flocks are kept by those engaged in mixed farming, but in the southern part of the province sheep ranching is conducted on a large scale. As one man can herd 1,200 to 1,500 sheep, that number or some multiple of it constitutes an economic unit.

The sheep population of Canada has not increased rapidly. In 1871 there were 3,155,599 sheep, and in 1929 there were only 3,731,358. In 1929 the production of wool was estimated to be 21,234,000 pounds, while we used about 90,000,000 pounds. We thus fall far short of meeting our wool requirements, while we produce enough wheat to feed a population eight or nine times that of Canada.

The Canadian Co-operative Wool Growers, Ltd., 217 Bond street, Toronto, acts in co-operation with the various associations in collecting and forwarding wools for grading and sale. They also act as selling agents. The Dominion Livestock Branch assumes responsibility for wool grade standards, and provides official wool graders for grading the co-operative shipments.

On the E.P. Ranch's Hampshire flock is kept, but most of the foundation stock is of the Merino type. Mutton stock has been introduced, so that many are now classed as Ramboulets. There is a wide difference of opinion as regards the merits of range wool, but Mr. J. B. Spencer, B.S.A., finds that as a rule these wools are quite satisfactory for medium fine tweeds, flannels, blankets and underwear. He points out that much depends on the care given the wool.

Sheep seem to be subject to nearly all diseases known to mankind and many of these troubles are contagious and difficult to cure. The mortality rate is liable to be high. There are often losses by depredation of dogs, coyotes and timber wolves. During the winter seasons the lives of both sheep and shepherd are endangered by storms, deep snow and blizzards. Again, the grass crop may be poor and the short term leaves give no encouragement for providing proper facilities. Taxes are heavy and suitable extra help at lambing and shearing time is hard to get. As many of the men can shear one hundred sheep a day, they should command good wages.

Even if a sheep rancher is lucky enough to escape all these hazards, he will still be operating at a loss. If help is not given him at once, he will pass out of the picture.

The following figures have been compiled as a result of examination of statements from many owners of sheep. As lambs cannot be fattened on the ranch, the average lamb brings \$2.50. As 25 per cent. of the ewes do not produce a lamb, this

crop brings only \$2.10 per breeding ewe. The wool clip amounts to about eight pounds per sheep, and this brings from four to six cents per pound. Thus the return per sheep is about \$2.60.

Without counting anything for the rancher's wages or the depreciation for machinery or buildings or breeding stock, the average ewe costs upwards of \$3.00 per year to keep. I have spoken to many sheepmen about the cost, and this figure seems to be the very minimum even when no misfortune befalls the flock. Clearly a loss must result and the larger the flock the greater the loss.

Different governments have from year to year been spending substantial sums to help the sheep men, but the help has been inadequate. The Canadian government has been giving higher protection to industry and if this is to be the policy, it should apply to the farming as well as to the manufacturing industry; to the west as well as to the east. Some mills are turning out excellent goods using all Canadian wool. We only produce about half as much raw wool as the home market requires. In the opinion of those who have studied the problem a tariff of 20 per cent. on raw wool would increase the price of a \$50 suit by 50 cents. The form, in which help can be given, rests with the government, but the urgency is evident by the fact that nearly all the ranchers declare that they cannot continue even another year without assistance.
